SharingPoint (Chy 15156) was established in 2002 and provides one-to-one and group counselling services to adults who are committed to recovery from a life without addiction. The SharingPoint model for recovery is unique in that it has been developed and refined over the past 15 years and takes elements of multiple treatment models, psychotherapeutic and counselling techniques together with other recovery approaches and practices. At its heart is the simple assertion that addiction and our true selves run counter to each other. Our service is also suitable for and available to adults who are affected by the addiction of a significant person in their lives such as spouse, sibling or parent. The common denominator for all our clients is that they are all committed to moving away from persistent self-destructive behaviours.
